## The Interior

The interior has been brought together through a considered selection of furniture, lighting and custom-made elements, creating a space that feels warm, calm and welcoming.

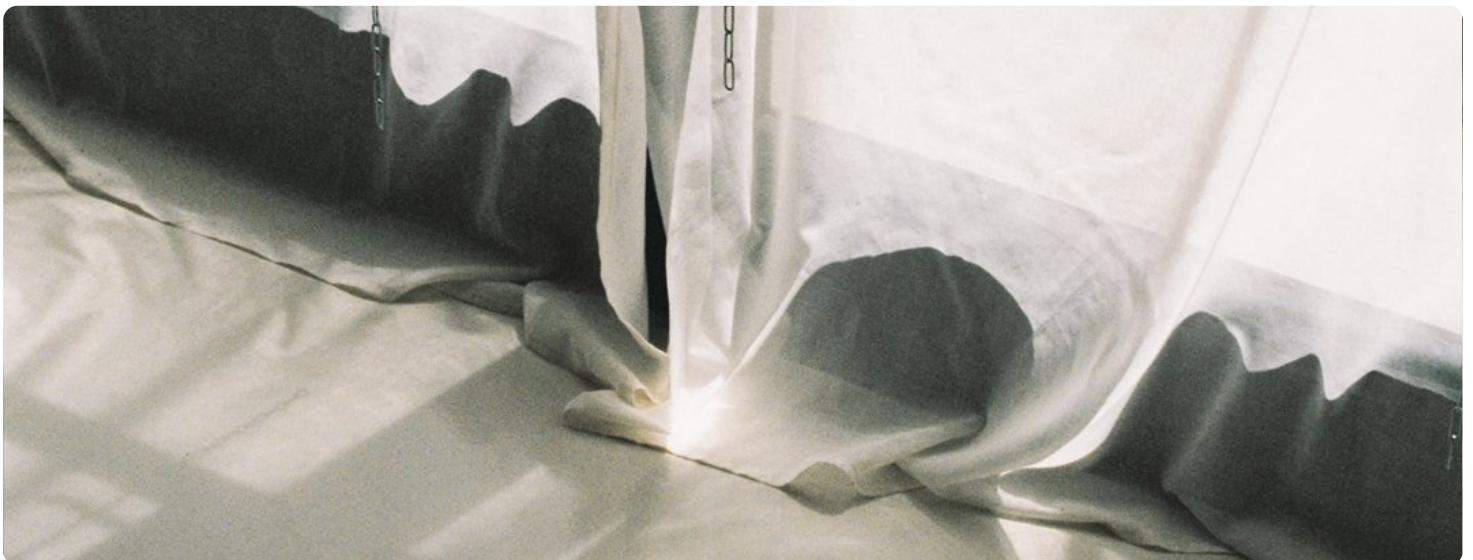

Natural materials, clean lines and warm wooden details give the space its character, creating an atmosphere that feels relaxed and timeless.

A custom-made curtain installation, developed in collaboration with a Berlin-based artist, explores the contrast between weight and lightness. Soft, flowing textiles are interrupted by suspended chains, creating a sculptural composition that shifts throughout the day as light and movement transform the space.

Drawing inspiration from the character of an artist's atelier, the interior incorporates a loft-style sleeping area that offers a sense of retreat within the open plan. Framed by custom-made Noren, inspired by traditional Japanese textile dividers, the space can be gently separated while maintaining a sense of openness and connection to the rest of the interior.

The lounge features the Eave Sofa by Audo Copenhagen, paired with the Kona Daybed by Ferm Living — balancing comfort with understated Scandinavian design, complemented by warm timber finishes throughout. Lighting by Louis Poulsen adds a soft, welcoming glow, while the Zodiac Mirror by Moustache introduces a playful sculptural detail that reflects light throughout the space.

The result is an interior that feels contemporary yet effortless — warm, functional and quietly distinctive. Each element contributes to an atmosphere that encourages you to slow down, gather, work and unwind with equal ease.
